

## Price list

### Metabolomics Jagiellonian Centre for Experimental Therapeutics (JCET)

| Targeted metabolomics                       |                         |                      |          |
|---|-------------------------|----------------------|----------|
| Quantification analysis                     | Jagiellonian University |                      | External |
|   | price A <sup>1</sup>    | price B <sup>2</sup> |          |
| Amino acids and its derivates               | 156                     | 200                  | 237      |
| Acetylcarnitines                            | 156                     | 200                  | 237      |
| Nicotinic acid and nicotinamide metabolites | 183                     | 235                  | 279      |
| TCA metabolites                             | 156                     | 200                  | 237      |
| PUFAs                                       | 183                     | 235                  | 279      |
| Eicosanoids                                 | 156                     | 200                  | 237      |
| NO metabolites                              | 102                     | 131                  | 155      |

<sup>1</sup> Source of payment from which indirect costs have already been discharged (e.g. NCN project)

<sup>2</sup> Source of payment from which indirect costs have not been discharged (e.g. unit funds)

All prices are in PLN. For external users, 23% of VAT will be added to the final price.

In order to estimate the total price for a metabolomics experiment, please contact us: [pam@jcet.eu](mailto:pam@jcet.eu)
